

Trybol concentrated mouthwash aroma-fresh

in two different variations of taste

Description Concentrated mouthwash in two different aromas/flavours:
cherry (TRY1102) / **liquorice** (TRY1101)
Trybol concentrated mouthwash is a very ecological product. Not as all the other ready for use mouthwashes this product is very concentrated and can be mixed with water right at home.

Usage Put a few drops in some lukewarm water, rinse and spill out after use.

| Ingredients | Effects |
|--------------------------------|---|
| Green tee extract: | the Japanese green tea extract has a slightly disinfecting effect and therefore successfully harms the building of plaque. Japanese Universities have proven that green tea has an anti-caries value. |
| Carbamid | this ingredient cares for the gums and for the mucous membrane in your mouth. |
| Vitamin-E | protects the mucous membrane against oxidated cellular stress (very important for smokers) |
| Cetylpyridiniumchlorid | has a slightly disinfecting value and therefore harms the building of plaque. At the same time it has a slightly deodorant effect. |
| PEG-40 Hydrogenated Castor Oil | this ingredient is won from the castor oil cleaning substance with perfect acceptability by the mucous membrane. |
| Aromas: | natural and nature indential aromas from cherry and liquorice. |
| Contents | a 100ml bottle is good for about 200 applications |
| Ingredients/INCI | AQUA, CAMELIA SINENSIS, PEG-40 HYDROGENATED CASTOR OIL, AROMATA, MENTHOL, UREA, POTASSIUM ACESULFAME, CETYLPYRIDINIUM CHLORIDE, TOCOPHEROL. |
